

Performance Maintenance Agreement

A Proactive Approach to Optimum System Performance

Ensure your system is performing efficiently and generating the savings it was designed to provide with comprehensive diagnostic testing by a Sundance Service Technician.

Cost: \$250 (Plus Tax)

Includes annual maintenance inspection and 15% off all repairs and services within 12 months of purchase.

- The cost includes drive time up to one hour and one hour of on-site performance analysis.
- If it is not our installation, we need to do an initial inspection of the system at normal service rates.
- All additional parts and labor will receive a 15% discount off our normal rate.
- Covers projects up to \$3,000 not including estimated work.

To set up your service, call the Sundance office at 828-645-2080 Or submit a request online at SundancePower.com

Standard System Checks

Solar Hot Water

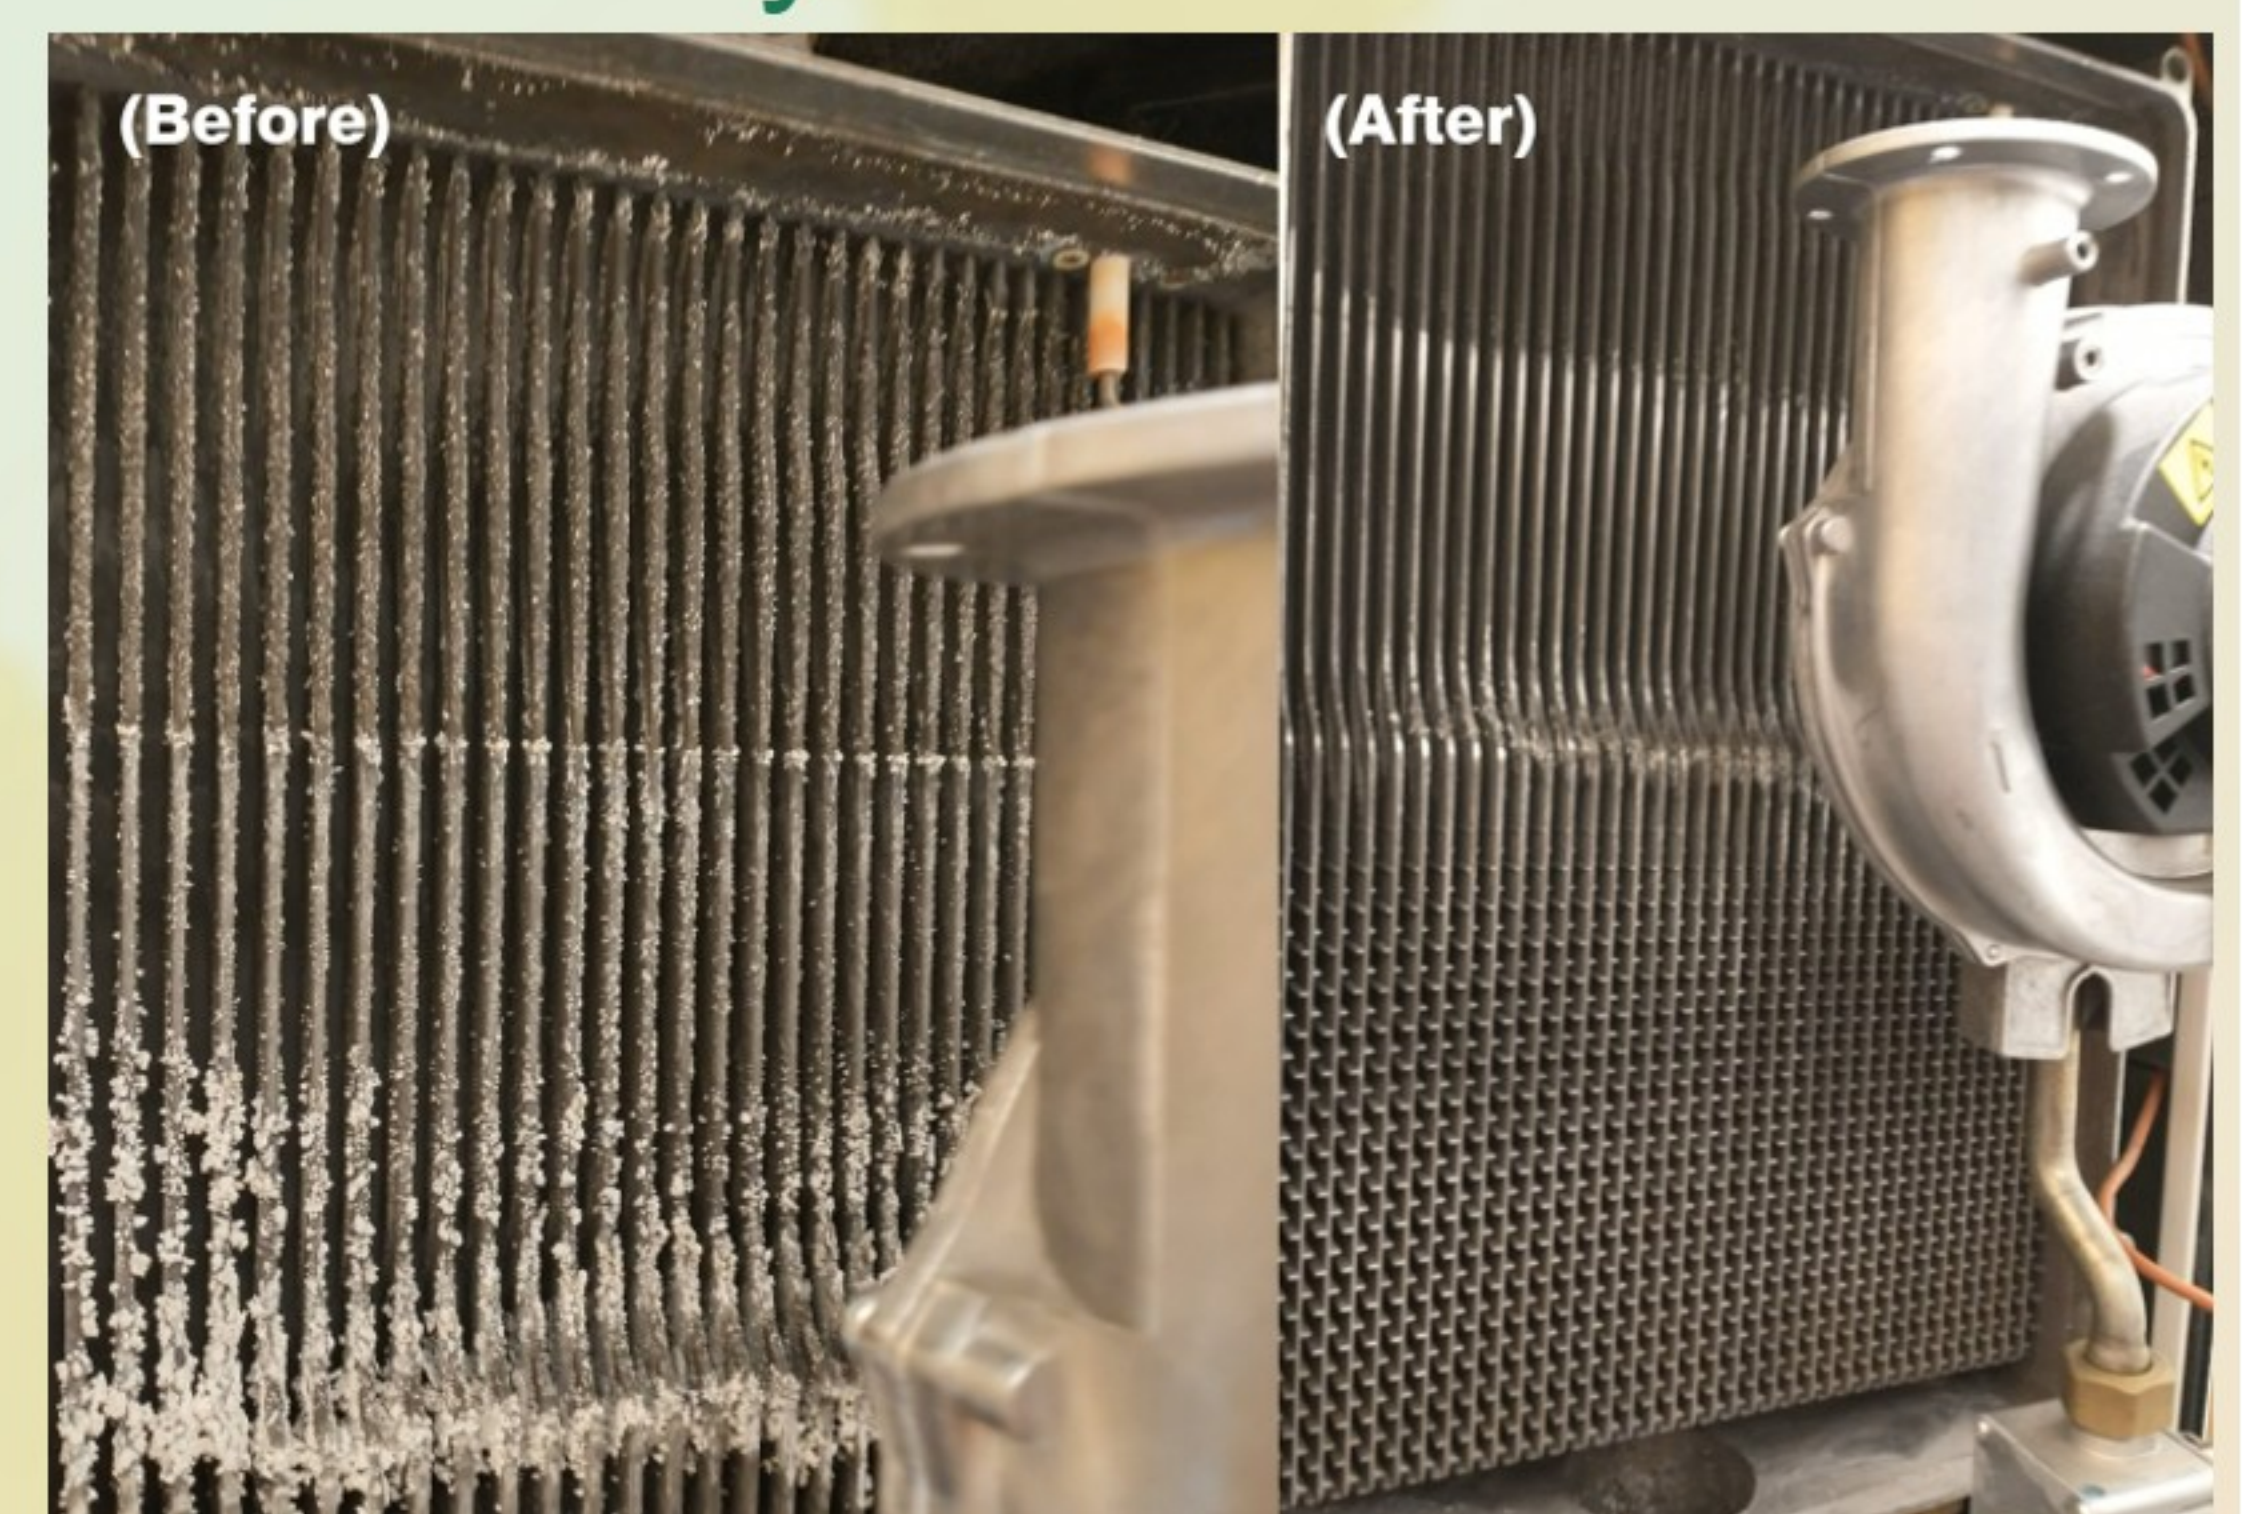

- Pumps and sensors
- Insulation
- Controller operations
- Antifreeze ratio & pH
- Pressure & flow
- Expansion tank
- Controller set points
- Update pictures of system

Off-Grid Solar / Batteries

- Open circuit voltage
- Panel Array voltage
- String current
- Controller set points & readings
- Update pictures of system

Boiler - Heating

- Igniter & thermostats
- Flame proving rod
- Inspect for leaks & proper flow
- Condensate drain line
- Combustion efficiency test
- System pressure & pump operation
- Log controller set points & readings
- Pressure relief valve
- Boiler - Heating regular service
- Clean outside of heat exchanger & burner
- De-scale deposits in heat exchanger plumbing
